Responsible Purchasing Guides

Think Outside the Bottle: Responsible Purchasing Guide for Bottled Water Alternatives
In a few short years, Americans have become dependent on the convenience of bottled water, so switching to alternatives can seem daunting. This Guide discusses how institutional buyers can transition to safe and inexpensive tap water with relative ease. In addition to a range of best practices for phasing out bottled water, we discuss water testing and filtration, bottle-less water coolers, water fountains, and reusable containers. We provide sample policies and specifications used by leading institutions as well as third-party standards for ensuring performance of water filters, coolers, and fountains.
